

Education

University of Michigan

Ann Arbor, MI, USA

Masters in Computer Science and Engineering

May 2028

- Coursework: Human-AI Interaction, Advanced Database Systems, Computer and Network Security.

The Northcap University

Gurugram, India

B. Tech Computer Science (AI/ML)

October 2021 - December 2025

- GPA: 3.65/4 (8.94/10; 25% merit-based scholarship every semester)
- Coursework: Computational Linguistics & NLP, Computer Vision, Applied AI & Expert Systems

Professional Experience

Kotronix Technologies

New Delhi, India

Silent Director

August 2026 - Present

Proprietor

February 2025 - August 2026

- Generated \$171K in revenue leading service and maintenance of DC fast charger guns, achieving ~87% cost savings compared to replacement for Lucknow City Transport Service Ltd. (LCTSL).

ISRO (Indian Space Research Organisation)

New Delhi, India

Project Intern

June 2024 – December 2024

- Developed an AI-powered disaster monitoring platform. Published research for the monitoring system in the Springer Nature's Earth Systems and Environment (Q1 journal) [[DOI link](#)]; awarded Indian copyright office registration for the resulting system.
- Improving relevance 5X over plain keyword-based methods using NLP and extractive QA.
- Designed a PostgreSQL database, built a custom API and React.js dashboard with advanced filtering for real-time and historical disaster analysis.
- Applied computer vision and large language models for rooftop and sand dune extraction tasks from satellite/aerial imagery.

CWE (Catalyst for Women Entrepreneurship)

Bangalore, India

Intern

May 2024 – June 2024

- Tailored a custom data automation tool that streamlined admin database cleaning, reducing 5+ hours of manual work to seconds

Rancho Labs

New Delhi, India

Python and AI Intern

15 June 2023 - 15 October 2023

- Designed educational content and projects on ML algorithms (CNNs, linear and logistic regression) to facilitate hands-on learning for students.

Leoforce

Hyderabad, India

Intern

25 May 2023 - 25 July 2023

- Designed and implemented interactive playgrounds and dashboards using JS and REST APIs for QA and AI products.
- Collaborated with the Data Science team to develop and test AI models, improving testing efficiency.

Projects

- *Offensive Check Model* – An NLP-based AI model that predicts whether input text is offensive using various machine learning algorithms. Built with Streamlit for the UI and deployed online with 86% accuracy. [Live Demo](#)
- *Scholar Stack (Beta Project)*: Platform where students can share quality notes and receive community service hours based on originality, quality, and effort. [Website](#)

Skills

- *Development*: React.js, Flask, CSS, PostgreSQL, MySQL, Python, Google Cloud Platform, Android Development, Git, GitHub, GitLab, Kubernetes
- *AI/ML*: Data Cleaning, Analytics, Visualization, Large language models (LLMs), Deep Learning, NLP, Computer Vision
- *Programming*: Python, Java, Kotlin, C, JavaScript, Dart
